

# Multi-Action respects the health of its customers and its employees. Our thermal paper does not contain Bisphenol A.

*“Extraordinarily high levels of BPA were found on two-fifths of the paper receipts tested recently by the Environmental Working Group, a nonprofit organization in Washington, D.C.”*

*CBS News, July 28, 2010*

*“Science News has the scoop on the latest Bisphenol A revelation: Sales receipts may be as big a source of exposure as the hard polycarbonate plastics dominating news about the hormone-mimicking chemical.”*

*The Daily Green, Oct 8, 2009*

*“Health Canada says it is dangerous to consume more than 25 micrograms per kilogram of body mass per day.”*

*The Vancouver Sun, Aug 30, 2010*

*“Studies suggest that low doses of BPA can interfere with the endocrine system, possibly contributing to such adverse health effects as cancer, reproductive problems, diabetes and hyperactivity.”*

*The Star, Aug 2, 2010*

*“Studies have linked the chemical to breast cancer, heart disease, diabetes, male infertility and other health problems. ... Several important studies are already in progress that will help to clarify the extent of human health impact of this chemical.”*

*USA Today, Nov 10, 2010*
