

# KL-100 & KL-150 Label Dispenser

ideal for all types of roll or fan-folded labels

The KL Series consisting of the KL-100 (for labels up to 4 1/2" wide) and the KL-150 (for labels up to 6" wide), Tach-It's KL series of pressure sensitive label dispensers is ideal for all types of roll or fan-folded labels. An economical alternative to our SH-404, the KL series utilizes photo-sensor reliability so that there are no micro-switches or hair triggers to adjust. High speed operation, large roll capabilities, industrial construction, and a rewind system for the label liner are advantages of this machine. Having the ability to dispense all types of die-cut and butt-cut labels, the KL series of machines, require no tools for label changeover or size adjustments, and no operator training is required.

## FEATURES

- Works with die-cut or butt-cut labels
- Fan fold labels
